REPORT OF THE COMPTROLLER OF THE CURRENCY

TREASURY DEPARTMENT,
OFFICE OF THE COMPTROLLER OF THE CURRENCY,
Washington, D. C., January 3, 1938.

SIR: As required in section 333 of the United States Revised Statutes, as amended, I have the honor to submit the following report covering the activities of the Bureau of the Comptroller of the Currency for the year ended October 31, 1937. This is the seventy-fifth annual report made to Congress by the Comptroller of the Currency.

ACTIVE NATIONAL BANKS

As required in section 5211 of the Revised Statutes, national banks were called upon to submit three reports of condition during the current annual report year. The figures for deposits and assets on each of these three call dates are as follows:

	Number of banks	Total deposits	Total assets
Dec. 31, 1936.....	5, 331	\$27, 608, 397, 000	\$31, 070, 441, 000
Mar. 31, 1937.....	5, 311	26, 515, 110, 000	30, 049, 172, 000
June 30, 1937.....	5, 299	26, 765, 913, 000	30, 337, 071, 000

On June 30, 1937, the 5,299 active banks reported loans and discounts, including overdrafts, of \$8,812,895,000; United States Government obligations direct and fully guaranteed of \$8,219,195,000; other bonds and securities of \$3,903,092,000; cash, balances with other banks, cash items in process of collection, and reserve with Federal Reserve banks of \$8,377,869,000; total assets of \$30,337,071,000, deposits of \$26,765,913,000; bills payable and rediscounts of \$8,530,000, capital stock of \$1,582,131,000; and surplus, profits, and reserves of \$1,630,034,000.

A comparison of the principal items of assets and liabilities for June 30 this year with those for June 30, 1936, the corresponding call last year, shows an increase of \$1,049,553,000, or 13.52 percent, in loans and discounts, their ratio to total deposits having increased from 29.61 to 32.91 percent; and, due primarily to an increase of 100 percent in the required reserves under section 19 of the Federal Reserve Act, the reserve carried with Federal Reserve banks increased 17.95 percent, or from \$3,520,901,000 to \$4,152,889,000. These increases in loans and reserves totaling \$1,681,541,000 were balanced in part by decreases of \$360,338,000 in bonds and securities, \$87,096,000 in cash, and \$548,449,000 in balances with other banks, including cash items in process of collection. The reduction in investments was made up of a decrease of \$170,458,000 in direct obligations of the United States Government, \$57,711,000 in obliga-

tions guaranteed by the United States Government as to interest and principal, \$76,015,000 in obligations of States, counties, and municipalities; and \$56,154,000 in other bonds and securities.

The total deposits on June 30, 1937, had increased \$565,460,000, or 2.16 percent, during the year. The June 30 deposits consisted of demand and time deposits of individuals, partnerships, and corporations of \$12,430,183,000 and \$7,469,842,000, respectively; United States Government deposits of \$379,331,000; State, county, and municipal deposits of \$2,203,466,000; postal savings of \$88,542,000; deposits of other banks of \$3,790,587,000; and certified and cashiers' checks, cash letters of credit, and travelers' checks outstanding, etc., of \$403,962,000. The time deposits of individuals, partnerships, and corporations included time certificates of deposit of \$591,423,000; time deposits, open accounts of \$305,715,000; and deposits evidenced by savings passbooks of \$6,511,352,000, comprising 15,794,219 accounts.

The book value of capital stock was \$1,582,131,000 and represented a par value of \$1,587,726,000. The latter figure consisted of class A preferred stock of \$281,012,000, class B preferred stock of \$17,965,000, and common stock of \$1,288,749,000. Surplus funds of \$1,073,154,000, undivided profits of \$389,233,000, reserves for contingencies of \$155,623,000, and preferred stock retirement fund of \$12,024,000, making a total of \$1,630,034,000, increased \$155,681,000 in the year.

Reports showing earnings and dividends are rendered semiannually to the Comptroller by all national banks, and their consolidated returns covering the year ended June 30, 1937, showed net profits before dividends of \$286,561,000, which was an increase of \$44,907,000, or 18.58 percent, over the amount reported for the year ended June 30, 1936. The three years ended June 30, 1935, 1936, and 1937 are the only years since 1931 that the consolidated returns showed the banks have operated at a profit. The profits for the year ended June 30, 1937, were \$234,020,000, or 445.40 percent, over 1931. Dividends declared on common and preferred stock in the year ended June 30, 1937, totaled \$153,475,000, in comparison with \$125,604,000 in 1936. The dividends were 9.67 percent of common and preferred capital and 4.78 percent of capital funds. The gross earnings from current operations aggregated \$847,197,000, and the expenses \$577,851,000, resulting in net earnings from current operations of \$269,346,000, an increase of \$22,992,000, or 9.33 percent, in the year. Recoveries on assets previously charged off of \$279,583,000, including profits on securities sold of \$124,858,000, decreased \$19,358,000, or 6.48 percent. Losses and depreciation charged off were \$262,368,000, a reduction of \$41,273,000, or 13.59 percent.

During the year, preferred stock of an aggregate par value of \$60,213,325 was retired by 1,320 national banks. One hundred and eighty such banks retired preferred stock in full and 1,140 completed partial retirements. Coincident with these retirements of preferred stock, the common capital of national banks, exclusive of newly organized banks, was increased \$35,367,245 and new or additional preferred stock in the aggregate sum of \$2,047,250 was issued. As of October 31, 1937, there was outstanding in 1,846 national banks preferred stock aggregating \$290,603,830 par value.

Authority to exercise fiduciary powers was held by 1,913 national banks, of which 1,551 were administering 135,772 individual trusts, with assets aggregating \$9,656,397,140 and 15,983 corporate trustee-

¹ Deficit.

NATIONAL BANKS

NET ADDITIONS TO PROFITS

1912-1937

The first deficit reported during the period represented above was for the six months July 1 to December 31, 1931, and amounted to \$62,299,000.

The deficit for the fiscal year 1932 was the first ever reported for a similar period since the establishment of the national banking system.

ships, with note and bond issues outstanding in the amount of \$10,570,032,665. Compared with June 30, 1936, these figures represent an increase of 2,930 in the number and \$91,745,854 in the volume of individual trust assets under administration, while corporate trusteeships decreased 1,014 in number and \$597,536,477 in volume of note and bond issues outstanding. Gross earnings from trust department operations increased \$3,520,000, or 11.63 percent, over 1936.

Section 304 of the Banking Act of 1935, amending section 22 of the Banking Act of 1933, provided for the termination of the double liability of shareholders of national banks on July 1, 1937. Section 315 of the same act amended section 5199 of the Revised Statutes to provide among other things that a national bank shall, before the declaration of a dividend on its shares of common stock, carry not less than one-tenth part of its net profits of the preceding half year to its surplus fund until the same shall equal the amount of its common capital. Prior to the Banking Act of 1935 the maximum surplus required of a national bank was but 20 percent.

It is interesting to note that at the date of the first call following the enactment of the Banking Act of 1935, namely November 1, 1935, of the total of 5,409 active national banks, 912 without preferred stock had surplus funds equal to or in excess of their common capital. The capital and surplus of these 912 banks was \$252,618,000 and \$428,258,000, respectively. On June 30, 1937, however, the date of the last bank call, this class of banks had increased 262 in number, or to 1,174, with common capital of \$457,357,000 and surplus of \$664,067,000. In 1935, 425 of the banks had surplus exceeding their capital stock compared to 481 banks in 1937. In addition, there were 187 banks on November 1, 1935, which had both common and preferred stock outstanding of \$80,713,000 whose surplus funds of \$35,813,000 equaled or exceeded their common capital of \$29,687,000. As of June 30, 1937, this latter class of banks had increased 37 in number, or to 224, with surplus totaling \$41,794,000 and common capital \$33,144,000. Since June 30, 1937, reports thus far received show that in 13 States 15 additional banks, with common stock only, have transferred \$371,000 to surplus in connection with dividends declared, making their total surplus \$2,660,000, or the same as their capital stock. The statement following shows the number, capital and surplus of all national banks on November 1, 1935, and June 30, 1937, and like information with respect to banks with surplus equal to or exceeding their common capital as of the same dates:

³ 1,953 banks.

One of the important questions before the Comptroller's Office has been the proper appraisal of assets in going banks. It was unfair to appraise assets at the existing cash market basis, and even where there were established market quotations, they could easily have been broken by forced liquidation. The Comptroller, therefore, instructed all national bank examiners to appraise assets on a "recovery basis,"

taking into consideration their intrinsic and potential values. The Comptroller's instructions are quoted in full in his annual report for the year ended October 31, 1934. For the first time, a survey was made of the classifications of loans in the 1934 reports of examiners. This survey showed that in the 5,275 banks examined, the total amount of loans was \$7,740,596,000. The examiners placed 2.88 percent of these loans in the loss column, 4.19 percent in the doubtful column, and 27.05 percent in the slow column. A compilation from the reports on 5,312 national banks made during 1937 shows total loans of \$8,426,931,749, of which .65 percent were placed in the loss column, 1.14 percent in the doubtful column, and 10.68 percent in the slow column.

ALL ACTIVE BANKS

Continued improvement is also shown in the condition of all classes of active banks in the country as reflected in their consolidated returns as of June 30, 1937. On that date there were 15,580 national, State, and private banks in the United States and possessions with loans and investments of \$49,972,315,000, which amount exceeded by \$1,273,623,000, or 2.62 percent, the figures reported as of June 30, 1936, when there were 15,803 banks. Cash, balances with other banks, and reserve with reserve agents of \$15,628,614,000 increased in the year \$506,233,000, or 3.35 percent, and the total assets amounting to \$68,941,069,000 increased \$1,742,488,000, or 2.59 percent. The total deposits in 1937 were \$59,822,370,000 and showed a rise of \$1,482,555,000, or 2.54 percent in the year. Although the total of capital stock, capital notes and debentures of \$3,250,650,000 showed a reduction of \$351,109,000, or 4.99 percent, due primarily to a decrease of 223 in the number of banks and the retirement of preferred stock and capital notes and debentures, the combined total of surplus, profits, and reserves of \$4,985,781,000 had increased \$435,914,000, or 9.58 percent. The ratio of loans and discounts, including overdrafts, to total deposits on June 30, 1937, was 37.94 percent compared to 35.72 percent on June 30, 1936.

It will be interesting to note the investments and total assets of all classes of banks in the country from June 30, 1929, to June 30, 1937, as shown in the following table:

INSOLVENT BANKS

With active national banks restored to a sound condition, and with only four national bank failures during the year ended October 31, the major problem before the Comptroller's Office has been the liquidation of insolvent national banks and the payment of dividends to depositors.

In order to expedite this work, there was established on January 15, 1937, a Termination Section of the Insolvent Bank Division for the primary purpose of devising ways and means to terminate receiverships and to actively consummate such plans. The chief methods used have been the disposition of remaining assets through bulk sales, termination loans, and through the transfer of assets to shareholders' agents. By these methods, funds are made available for distribution to creditors in the form of a final dividend, and the immediate termination of the receivership ensues.

During the year ended October 31, 1937, 341 national bank receiverships, including 2 District of Columbia State bank receiverships under the supervision of the Comptroller's office, were liquidated and finally closed. This is the greatest number of closings ever effected during a Comptroller's report year. These banks had deposits at failure of \$154,754,207, of which \$113,600,000, or 73.41 percent, was returned to depositors. The total cost of liquidation in these trusts was 6.83 percent of the collections from assets and stock assessments, including offsets allowed.

Remaining in process of liquidation on October 31, were 882 national and District of Columbia State bank receiverships. Their total deposits at date of failure were \$1,689,372,000, of which approximately \$1,227,000,000, or 72.63 percent, had been returned to depositors. Receivers have estimated that additional payments of \$237,527,000, or 14.05 percent, will be made, bringing the total estimated recoveries to depositors in all the remaining receiverships up to 86.65 percent.

As of October 31, 1937, the total commitments granted by the Reconstruction Finance Corporation to the receivers of insolvent national banks amounted to \$494,495,500, of which \$389,399,367 was actually loaned. Of this amount commitments aggregating \$13,669,500 had been granted to 27 receivers during the year ending October 31, 1937. During that year the balance due to the Corporation by all receivers of insolvent national banks declined from \$21,913,601.76 to \$8,900,734.80 and the number of borrowing receiverships declined from 315 to 101.

In accordance with President Roosevelt's expressed desire for the Government to withdraw from business as soon as privately owned agencies were able to take over the functions of the Government lending agencies, various State and national banks located in the vicinity of closed national banks have taken over Reconstruction Finance Corporation loans, or made original loans, in the approximate amount of 64½ million dollars. Of this total commitment, approximately 60 million dollars has been actually advanced, of which nearly 54 million dollars had been repaid on October 31, 1937.

The amount repaid includes loans to 53 receiverships which have been paid in full, and the balance unpaid is owing by 42 trusts.

In order to reduce expenses in the receiverships, the practice was adopted of combining several receiverships under one receiver when

the assets were reduced to the point where the work involved did not require the receiver's full time. In accordance with this plan, the 882 receiverships remaining on October 31 were being administered by 367 receivers, or an average of 2.4 receiverships per receiver.

In order to handle more effectively the real estate owned by and mortgaged to 1,173 insolvent national banks, then under active re-

INSOLVENT NATIONAL BANKS

ceivership, and to issue appropriate instructions with regard to the management and disposition thereof, the Real Estate Activities Section of the Insolvent Bank Division was established on January 22, 1937. The section has obtained from 622 receivers reports covering approximately 10,000 assets secured by liens on real estate, which reports were carefully analyzed as a basis for issuing appropriate in-

structions to the receivers. Personal calls were made on receivers of approximately 200 banks, for the purpose of investigating the real estate owned, and assets secured by liens on real estate, and auction sales of real estate in 96 trusts were attended. In some cases, these sales were conducted by highly specialized auctioneers, and in other cases the receivers were authorized to utilize the services of local auctioneers. An analysis of the results obtained discloses that with few exceptions the sales were highly successful. Among the outstanding auction sales were those held in Chattanooga, Tenn., and Benton Harbor, Mich., covering the real-estate holdings of the First National Bank and Chattanooga National Bank of Chattanooga, Tenn., and the American National Bank and Trust Co., Benton Harbor, including the real estate of the Commercial National Bank and Trust Co. of St. Joseph, Mich. The sale in Chattanooga covered 186 parcels for which the receivers realized \$512,305. This sale was attended by approximately 4,000 persons. Due to the interest shown in the sale of the Chattanooga properties, the receivers immediately found purchasers for the deferred payment notes and realized therefor face value and accrued interest to date of sale. At the sale conducted at Benton Harbor the receivers sold 20 parcels for a total of \$198,185, the total bids representing approximately 99 percent of the receivers' estimated values of the properties.

Immediately following announcements in local newspapers to the effect that the real-estate holdings of the national bank receiverships would be sold at auction, letters were received from local real-estate agents and creditors of the banks objecting to this method of disposing of the real estate; however, without exception, after the sale these same parties appeared to be more than satisfied with the results obtained for the reason that the offers received were usually commensurate with the values of the properties, and for the further reason that considerable interest was developed in real estate in general. It should also be borne in mind that real estate owned by closed national banks must be classified as "distressed real estate," and usually retards the recovery in the real-estate market. Considerable real estate has also been disposed of through the efforts of receivers and members of local real-estate boards. Since the establishment of the real estate section, receivers have been authorized to accept offers for 7,923 parcels of real estate, which should enable them to realize approximately \$31,000,000. Bank buildings are often one-purpose properties, but in spite of this, receivers have been authorized to accept offers obtained for 194 such properties. Preparations are now being made to obtain information from receivers as to the number and amounts of deferred payment notes or contracts acquired in connection with sales of real estate in order to negotiate intelligently for the sale of these assets. Inquiry discloses that large insurance companies are interested in the purchase of these deferred-payment notes and mortgages, and it is hoped that the outcome of further negotiations will lead to an early liquidation of same, which will make possible the rapid termination of additional receiverships.

In the year ended October 31, 1937, receivers and trustees for waiving creditors of national banks, unlicensed incident to the banking holiday, released and made available to creditors \$42,077,776 of the remaining unsecured liabilities. The total of such liabilities released

since the banking holiday is \$1,562,739,935, or 81.28 percent, compared to 79.09 percent as of October 31, 1936.

During the year four national banks have failed, with deposits at closing of \$4,294,296. Of these deposits 79.79 percent, or \$3,030,000, were insured, and 99.08 percent of the depositors were fully protected, by insurance, offset, security, or preferment.

NATIONAL BANK SUSPENSIONS

ACTUAL FAILURES, YEARS ENDED OCTOBER 31, 1912-1937,
FOR WHICH RECEIVERS WERE APPOINTED

Dates of receivers' appointments and dates of suspensions of banks are not necessarily the same.

Banks are not considered as actual failures where the depositors were paid in full and the banks placed in voluntary liquidation and it later became necessary to appoint receivers to collect stock assessments or for other purposes.

During 1933, 393 suspensions occurred before or during the banking holiday, while only three occurred during the remainder of the year. In addition receivers were appointed to complete the liquidation of 292 banks which suspended before or during the banking holiday and which later were reorganized with partial payments to depositors.

In the 9 banks which were suspended during 1934, 1935 and 1936, all deposit accounts up to \$5,000 were insured by the Federal Deposit Insurance Corporation.

The following tables indicate the number of failures in all classes of banks from 1927 to 1937, inclusive.

FEDERAL DEPOSIT INSURANCE CORPORATION

The Federal Deposit Insurance Corporation of which the Comptroller of the Currency is a director, was organized in the summer of 1933, and insurance up to \$2,500 for each depositor became effective on January 1, 1934. This limit was increased to \$5,000 on July 1, 1934. As of June 30, 1937, there were 13,941 banks, with deposits of \$48,802,185,000 insured by the Corporation. It was estimated that \$21,400,000,000, or 44 percent, of their deposits were insured. Of their more than 50 million depositors, over 98 percent were fully covered by insurance, security or preferment.

During the year ended October 31, 1937, 55 bank failures occurred in the United States. Of these banks, 47, with deposits of \$14,438,000, were insured. Four of these 47 insured banks, with deposits of \$4,294,000, were national banks; 2, with deposits of \$1,707,000, were State banks which were members of the Federal Reserve System; and 41, with deposits of \$8,437,000, were State nonmember banks. In these 47 insured banks, 95.2 percent of the deposits were covered by insurance, offset, security or preferment, and 99.7 percent of the depositors were covered in full.

The total assessments paid to the Corporation by all insured banks for the year 1937, amounted to \$38,811,953, of which the national banks paid 54.83 percent. It will be interesting to note the deposits in the various classes of insured banks, as shown in the following table.

NATIONAL CHARTERS ISSUED

During the annual report year, only eight primary charters were issued for national banks, in keeping with the policy of avoiding the recurrence of the over-banked condition which has been regarded as a contributing factor to the banking collapse of March 1933.

RETIREMENT SYSTEM

The retirement system for national bank examiners, assistant examiners and clerks, authorized by Congress and placed into effect on June 1, 1936, covered 734 persons on October 31, 1937. Up to that time 6 death benefits, amounting to \$4,278.87, had been paid, and one retirement had occurred. The present assets of the system are as follows:

Treasurer's account.....	\$38, 371. 77
U. S. Government bonds.....	665, 000. 00
Unamortized premiums paid.....	1, 946. 74
Accrued interest purchased.....	437. 50
Expenses paid.....	300. 00
Total.....	\$706, 056. 01

While the system has hardly been in operation for sufficient time to furnish a basis for reliable conclusions as to its future operations, the evaluation indicates that it is operating on a conservative basis, with liabilities approximately as anticipated.

LEGAL DIVISION

The Legal Division of the office of the Comptroller of the Currency is called upon for a great variety of services to national banks in connection with both going and insolvent institutions. It is called upon to advise upon prospective banking legislation, and to interpret the provisions of the national banking laws. It also advises upon matters of capital changes of national banks and determines questions in connection with consolidations, conversions, voluntary liquidations, and reorganizations. A large portion of the work of the Legal Division still consists of services in connection with the liquidation of insolvent national banks in receivership.

Although each receiver in the field has local counsel, the Legal Division of this office, by reason of its personnel being trained specialists in the legal problems arising incident to such liquidation, supervises all important litigation growing out of the receivership work. In addition, the Legal Division is constantly advising the receivers, and through the receivers, their attorneys, upon various legal problems and questions concerning the rights and liabilities of the receivers, even where litigation is not involved.

All appellate cases are actively supervised by this division, the pleadings and record are examined, citations of authorities are given,

and in many instances the briefs are entirely revised or rewritten in this office. Where necessary, attorneys from the office participate in the field in the argument of these cases. All cases reaching the Supreme Court of the United States incident to the receivership work, are (except in occasional instances), participated in or handled entirely by the attorneys of this division. As of October 31, 1937, there had been appointed 755 general attorneys and 836 special attorneys to represent receivers in the field. In the various receiverships throughout the country, approximately 10,000 cases are now pending.

During the year ending October 31, 1937, the Legal Division prepared and argued six cases in the Supreme Court, winning four and losing two. Three additional cases in the Supreme Court were prepared and argued by local attorneys for the receivers, and of these two were lost and the decision in one was in favor of the receiver.

Petitions to the Supreme Court for writs of certiorari to review decisions which had been rendered in favor of the receivers in the circuit courts of appeal were filed by the private litigants in 17 cases. The Supreme Court denied certiorari in 12 of the cases (thereby permitting the decisions to stand in favor of the receivers), and granted the writs for review in 5 of them. Petitions for writs of certiorari were filed by receivers in 16 cases to review decisions rendered adversely to the receivers by the circuit courts of appeal. Eight petitions were granted and eight denied.

Sixty-four cases were decided by the United States circuit courts of appeal during the year. Forty-one of these cases were decided in favor of the receivers, and 23 were decided against the receivers.

Two of the cases reaching the Supreme Court may be especially noted. *Barbour v. Thomas*, 86 Fed. (2d) 510, certiorari denied, 57 Sup. Ct. 513, decided in favor of the receiver, sustained a stock assessment of a face value of approximately \$25,000,000. The case established important principles of law relating to holding companies and the real as distinguished from the record ownership of stock. *Mechanics Universal Joint Company v. Culhane*, 299 U. S. 51, decided in favor of the receiver, passed upon important questions of law concerning the rights and duties of officers and directors of national banks.

SUGGESTIONS FOR LEGISLATION

Since the national banks are functioning successfully under the existing laws governing them, the only recommendation made for additional banking legislation other than suggestions made in earlier reports which have not been acted upon, is with reference to loans to executive officers.

Section 12 of the Banking Act of 1933, approved June 16, 1933, prohibited executive officers of banks which are members of the Federal Reserve System from becoming indebted to their banks. Officers who were indebted at the time were given 2 years in which to pay their obligations. This section was amended by House Joint Resolution 320, approved June 14, 1935, to extend the time in which executive officers could pay their indebtedness to June 16, 1938. The Banking Act of 1935 permitted an executive officer, with the prior approval of a majority of the entire board of directors of the bank, to become indebted to the bank in an amount not to exceed \$2,500. On June 30, 1933, 4,404 national banks held direct loans of

their executive officers in the sum of \$93,743,000, and indirect loans in the amount of \$43,487,000. On June 30, 1937, these direct liabilities had been reduced 69.83 percent and amounted to \$28,281,000, while the indirect obligations were reduced 62.11 percent and amounted to \$16,477,000, and 1,283 of these banks showed no liabilities of their executive officers. It would seem that the officers had in good faith made an effort to pay their obligations and to comply with the express will of the Congress. In view of this fact, it is recommended that an additional year be given to the executive officers to pay the balance of their indebtedness. This will give a total of 6 years, and it would seem that further extension could not be justified.

MAJOR PERSONNEL CHANGES

On October 15, 1937, the office of the chief national bank examiner of the fifth Federal Reserve district, located in the city of Washington, was consolidated with the examination division of the office and the duties of the district chief examiner were assumed by the chief national bank examiner attached to this office. Mr. I. I. Chorpening, the chief examiner for the fifth district, was transferred to the examining force of the second Federal Reserve district. This change eliminated a duplication of offices in Washington and effected a material reduction in operating expenses.

Owing to the substantial decrease in the number of active receivers requiring attention from the Legal Division, a considerable reduction will be made in its personnel, in the interest of economy of administration. A similar decrease in personnel will be effected in the Insolvent Bank Division in view of the rapid termination of receiverships and the small number of new receiverships which have been added.

ASSAY COMMISSION

The annual Assay Commission, appointed by the President to test the weight and fineness of certain coins reserved by the several mints during the year, met at the United States Mint at Philadelphia on February 10. The Comptroller of the Currency, as an ex officio member of the committee, was in attendance. The proceedings of the Commission may be obtained from the Director of the Mint.

SUMMARY OF ACTIVITIES OF THE BUREAU 1933-37

During the 12-year period from 1921 through 1932, 10,664 banks of all classes, with deposits of \$4,665,531,000, failed in the United States. The banking situation became increasingly alarming. Fear spread among depositors, heavy withdrawals occurred throughout the country, and the complete collapse of the banking structure appeared imminent. Prompt and courageous steps were necessary to avoid such a catastrophe, and on March 6, 1933, the President issued a proclamation temporarily closing all banks in the nation until a program could be developed for dealing with the situation. On March 9, Congress passed, without a dissenting vote, the Emergency Banking Act to provide relief in the national emergency in banking.

The following summary indicates the steps which have been taken and the progress which has been made in restoring the national banking structure to its present sound status. The summary covers the period from March 16, 1933, the end of the banking holiday, to October 31, 1937.

1. The first problem confronting the office was the disposition of 1,417 national banks with unsecured liabilities of \$1,922,698,738, which were denied licenses to open at the conclusion of the banking holiday. By February 6, 1935, all of these banks had been disposed of, 1,114 having been reorganized under various plans, 290 having been placed in receivership following disapproval of reorganization plans, and 13 having gone into voluntary liquidation. A total of \$1,562,739,935, or 81.28 percent, has been made available to the depositors and creditors of these banks.

2. To assist in strengthening the capital structure of going banks, the President appointed a committee on October 23, 1933, of which the Comptroller was a member, to pass upon the purchase by the Reconstruction Finance Corporation, of preferred stock of State and national banks. Since this time, 2,263 national banks have issued preferred stock aggregating \$564,245,550, of which \$498,977,944 was purchased by the Reconstruction Finance Corporation, and \$65,267,606 was purchased locally. By October 31, 1937, 408 banks had retired in full, preferred stock aggregating \$182,685,400, and 1,267 banks had effected partial retirements and decreases amounting to \$90,956,320, leaving a total of \$290,603,830 outstanding. Coincident with these retirements of preferred stock, common capital of national banking associations, exclusive of newly organized banks, was increased by \$80,422,435.

3. To expedite the liquidation of all receivership banks and the payment of dividends to depositors, a Deposit Liquidation Board, of which the Comptroller was a member, was appointed by the President on October 15, 1933. Under the supervision of this committee, the Reconstruction Finance Corporation made loans to receivers of national banks in the total amount of \$389,399,367, of which \$380,498,632 had been repaid by October 31, 1937. Going banks took over some of these receivership loans from the Reconstruction Finance Corporation, and also made original loans to receivers, the total of

all such loans by going banks amounting to \$59,403,686, of which \$53,952,233 had been repaid by October 31, 1937.

4. To facilitate the work of liquidation, a reorganization of the work of the Insolvent Bank Division was made in January 1937, and several special units were established to handle various phases of liquidation.

5. More receiverships were terminated during the year ended October 31, 1937, than in any previous annual report year, the total number of terminations being 341.

6. During the period from March 16, 1933, to October 31, 1937, 815 receiverships were terminated. Total disbursements to their depositors and other creditors amounted to \$315,943,544, or 79.35

INSOLVENT NATIONAL BANKS

Disposition of Collection Dollar (Including Offsets Allowed) in Closed Receivership Banks the Liquidation of Which Has Been Completed

815 Receiverships Liquidated and

percent of total liabilities established. This may be compared with the termination of 729 receiverships during the 21-year period from 1912 through 1932, an average of 35 a year.

7. The total cost of liquidation in all receiverships terminated during the period covered in this summary was 7.13 percent. In other words, the depositors received over 92½ cents out of every dollar collected.

8. Public auction sales for the disposition of real estate held by receivers were introduced, where practicable, in connection with the termination of some of the receiverships. In 132 receiverships, 5,571 property items with estimated liquidation value of \$5,000,000 were disposed of in this manner. In addition, private sales of 2,329 receivership property items were made, resulting in total sales, private and auction, of approximately \$31,000,000.

9. The policy has been adopted of consolidating several receiverships under one receiver when the assets have been reduced to the

point where a receiver's full time is not required. As of October 31, 1937, there were 367 receivers with an average of 2.4 receiverships per receiver, and with as many as 10 receiverships under 1 receiver. This has involved little or no increase in the average salaries of receivers and has made possible corresponding economical consolidations of receivers' staffs of clerks and assistants.

10. For a period of 22½ months, from September 30, 1935, to August 14, 1937, only one national bank failure occurred, a record which had not been equalled for nearly 66 years. Only 12 national banks have failed since the conclusion of the banking holiday, and 9 of these were insured by the Federal Deposit Insurance Corporation. Three banks failed prior to January 1, 1934, before insurance became effective.

11. A new high record for deposits of national banks was reached on December 31, 1935, when 5,392 banks reported deposits of \$24,847,733,000. The deposits continued to show an increase on each successive call date until December 31, 1936, when total deposits of \$27,608,397,000 were reported by 5,331 national banks. This is the highest figure ever reported in the history of the national banking system. At the date of the last call, on June 30, 1937, deposits of \$26,765,913,000 were reported by 5,299 banks, exceeding by \$9,991,798,000, or 59.57 percent, the deposits of \$16,774,115,000 reported by 4,902 banks on June 30, 1933, the first call following the banking holiday.

12. Loans and discounts, including overdrafts, of national banks on June 30, 1937, were \$8,812,895,000, exceeding by \$693,123,000, or 8.54 percent, the figure reported on June 30, 1933.

13. The highest figure ever reported for total assets of national banks was on December 31, 1936, when they amounted to \$31,070,441,000, surpassing by 1.57 percent the previous high record of December 31, 1928, when there were 2,304 more banks in operation. The assets reported on June 30, 1937, were \$30,337,071,000, or an increase of 45.43 percent since June 30, 1933.

14. In the 4-year period from June 30, 1933, to June 30, 1937, loans and investments of national banks increased 35.14 percent; cash and exchange, including reserve with Federal Reserve banks, increased 103.40 percent; capital stock increased 4.39 percent; and surplus, profits and reserves increased 21.56 percent.

15. The highest figure ever shown for net profits before dividends was that of \$313,826,000, taken from the consolidated returns of all national banks for the year ended December 31, 1936. The net profits of \$286,561,000 for the year ended June 30, 1937, represented an increase of \$504,945,000 over the year ended June 30, 1933, when the consolidated returns showed a deficit of \$218,384,000.

Total deposits of 5,331 banks as at December 31, 1936, of \$27,006,307,000 were the largest reported in the history of the National Banking System, exceeding by \$3,201,017,000, or 13.34% the amount reported by 7,535 banks as at December 31, 1928, the date of the previous high record prior to the 1933 Banking Holiday.

16. It is believed that a new high record for deposits of all classes of banks in the country was reached on December 31, 1936, when the 15,704 active associations reported \$61,155,014,000. This is the first date for which the Comptroller's Office received returns of all classes of banks at the end of the calendar year, so comparable figures for former calendar years are not available in this office. The highest figure recorded for a June call, however, was \$59,847,195,000 reported by 24,079 banks in 1930. On June 30, 1937, the total deposits of the 15,580 active banks were \$59,822,370,000.

17. In the 4 years from June 30, 1933, to June 30, 1937, the ratios of increases in the principal items of assets and liabilities of all banks were as follows: Loans and investments, 23.94 percent; cash, balances with other banks and reserve with reserve agents, 101.28 percent; total assets, 34.38 percent; total deposits, 44.03 percent; capital stock, including capital notes and debentures, 12.11 percent, and surplus, profits and reserves, 11.15 percent.

18. The development of trust activities in national banks is emphasized by comparing the figures for 1937 with those for 1933. This reflects an increase during the 4-year period of 40,615, or 36.54 percent, in the number of trusts being administered; an increase of \$3,344,739,387, or 52.99 percent, in the volume of individual trust assets under administration, and an increase of \$151,605,728, or 1.46 percent, in the volume of note and bond issues outstanding for which national banks were acting as trustees. Growth in earnings from trust department operations has kept pace with the increased volume of trusts under administration as revealed by the fact that during the fiscal year ended June 30, 1937, gross earnings aggregating \$33,779,000 were reported as against \$21,461,000 in 1933, representing an increase of \$12,318,000, or 57.40 percent.

19. Primary charters were issued for only 73 national banks during the period from March 6, 1933, to October 31, 1937. This may be compared with the figure of 387 primary charters issued during the 5 years from November 1927 through October 31, 1932.

20. In August of 1937, the Comptroller requested a list of all assistant national bank examiners who had been in the service 10 years or more. There were 28 such assistant examiners located in 9 of the 12 Federal Reserve districts. On September 1, the Comptroller wrote to each of the chief examiners in charge of these Federal Reserve districts, setting forth his previously expressed policy of filling vacancies on the examining staff by promotion from the ranks of assistant examiners, calling their attention to the assistants who had been in the service 10 years or more, and requesting a statement of their views and recommendations regarding each of these assistants. As the result of this investigation some of the assistants were immediately given an examination and appointed examiners and a large percentage of the others will be promoted as vacancies occur. Since the present Comptroller took office in May 1933, 89 assistant examiners have been promoted to the position of national bank examiner. Of these men, 79 were assistant examiners at the time the Comptroller took office.

21. Since the banking holiday of 1933, the Legal Division of the office (in cooperation with its field attorneys) has handled approximately 50,000 cases in the various trial and appellate courts, including the Supreme Court of the United States. They involved practically every phase of national bank receivership operations and have clarified and settled and virtually restated the maze of legal principles governing the subject. These decisions constitute, in the aggregate, a distinct and important contribution to the great body of the law relating to bank liquidation.

22. On February 15, 1936, regulations governing the purchase of investment securities and further defining the term "Investment securities" as used in section 5136 of the Revised Statutes, as amended by the Banking Act of 1935, were promulgated and sent to all member

banks. The principal difference between these regulations and those previously issued by the Office of the Comptroller of the Currency was the raising of the standard of eligible investment securities and the prohibiting of investing in speculative issues.

23. In 1935 the Comptroller formulated a code of ethics for bankers designed to establish professional standards for those engaged in banking. The suggested code was enthusiastically received and a number of State bankers' associations published copies of it and distributed them to their members.

24. The retirement system for national bank examiners, assistant examiners, and clerks on the examining force, recommended by the Comptroller and authorized by the Seventy-fourth Congress, was placed in effect on June 1, 1936. On October 31, 1937, its benefits covered 734 employees.

25. Under the provisions of the Banking Act of 1933, the Comptroller of the Currency was named as a member of the Board of the Federal Deposit Insurance Corporation. As there were over 8,000 State banks which had to be examined before the insurance became effective on January 1, 1934, and as the other two members of the Board did not take office until September 11, 1933, it was necessary for the Comptroller to lay the foundation for the organization of the Corporation. This preliminary work included building up a force of competent examiners; correspondence with the governors of the various States relative to possible legislative or constitutional changes or amendments necessary within the States to enable nonmember banks therein to take advantage of Federal Deposit Insurance, and relative to the banking situation in the several States; and the drawing up of a preliminary chart covering the activities of the Corporation. On January 1, 1934, 13,423 banks were insured. On June 30, 1937, 13,941 banks with deposits of \$48,802,185,000 were insured, 44 percent of their deposits, and over 98 percent of their depositors, being covered in full. From January 1, 1934, to October 31, 1937, 184 banks, with deposits of \$72,366,000, failed in the United States, of which 117, with total deposits of \$34,110,000, were insured. Nine of these 117 banks, with deposits of \$9,736,000, were national banks; 2, with deposits of \$1,707,000, were State banks which were members of the Federal Reserve System; and 106, with deposits of \$22,667,000, were State nonmember banks. Approximately 89.6 percent of the deposits in these 117 insured banks were covered by insurance, offset, security or preferment, and over 99 percent of the depositors were covered in full.

26. In June 1936 the Examination Division inaugurated the publication of a periodical entitled "Bulletin of the Comptroller of the Currency," for distribution among all field examiners. This periodical contains excerpts from letters and other official data constituting the administrative "rulings" of the Office. It is published in such form as to provide convenient and ready reference by the examiner in the field, and has been valuable in maintaining throughout the country a uniform application of the laws and regulations relative to the operation of national banks.

27. During 1936 the Bureau issued a compilation of Federal Laws Affecting National Banks as of January 1, 1936, and also published Volume V of the Digest of Decisions Relating to National Banks.

28. The Comptroller is required by law to include in his annual report to Congress recommendations for any amendment to the laws relative to banking by which the system may be improved. Following is a summary of all such recommendations made by the present Comptroller:

A. In the reports for the years ended October 31, 1933 and 1934, recommendations were made for various corrective and clarifying legislation, with particular reference to the Banking Act of 1933. These recommendations were favorably acted upon by Congress and are now a part of the laws relating to national banks. The points covered were as follows:

(1) The provisions of law requiring the publication of reports of affiliates were modified and the requirement that a holding company affiliate obtain a voting permit in order to vote its shares of stock in a bank in favor of the voluntary liquidation thereof was eliminated.

(2) The conflict between the provisions of law requiring that Federal officials obtain interest on deposits of public funds and the provision prohibiting the payment of interest on demand deposits by banks to such Federal officials was eliminated.

(3) Power was given to the Board of Governors of the Federal Reserve System to define the term "executive officer," and the time limit within which loans by banks to their executive officers made prior to June 16, 1933, may be renewed was extended to June 16, 1938.

(4) National banks were authorized to deal in securities and stocks to the extent of purchasing and selling certain securities and stocks without recourse solely for the account of their customers.

(5) The provisions of law dealing with consolidation were amended to provide for effective passage of fiduciary powers of the constituent banks to the consolidated bank, for accountability to dissenting stockholders for the proceeds of the sale of stock in excess of the appraised value thereof, and to meet the situation where one appraiser refuses to agree with the other two appraisers.

(6) The denial of the right to vote shares of its own stock held by a national bank as sole trustee was modified so that now only the matter of the election of directors is so affected.

(7) The right of the bank to deduct dividends on preferred stock owned by Reconstruction Finance Corporation from its gross income in computing its net income for tax purposes placed banks that had issued preferred stock to Reconstruction Finance Corporation on a parity with banks that had issued capital notes or debentures to Reconstruction Finance Corporation.

(8) Provision was made whereby the so-called double liability attaching to the ownership of common stock of national banks could be terminated.

(9) Provision was made that prior to the payment of cash dividends upon the shares of common stock of a national bank, a transfer of a percentage of the net earnings of the bank for the preceding 6-months period to its surplus account should be made until such time as its surplus account equaled the amount of its common capital.

(10) The conflict between the provision of law permitting national banks to deal in, underwrite, and purchase for their own accounts obligations of the United States and certain other specified obligations, on the one hand, and prohibiting any corporation engaged in the business of issuing, underwriting, selling, or distributing stocks,

bonds, debentures, notes, or other securities, from engaging at the same time to any extent whatever in the business of receiving deposits subject to check, on the other hand, was eliminated.

(11) Provisions were made in the laws relating to insured banks (a) that authorized Federal Deposit Insurance Corporation to make loans secured by, or to purchase, the assets of an open or closed insured bank in order to reduce a risk or avert a threatened loss to that Corporation; (b) that empowered the Board of Federal Deposit Insurance Corporation to pass upon the granting of insurance to State nonmember banks; and (c) that required insured State nonmember banks to make reports of condition to Federal Deposit Insurance Corporation and to publish such reports in the manner prescribed by that Corporation.

B. The following recommendations contained in the annual report for the year ended October 31, 1935, were enacted into law:

(1) Provision for extending the time limit within which the Federal Deposit Insurance Corporation may make loans secured by, or may purchase, the assets of an open or closed insured bank in order to reduce a risk or avert a threatened loss to the Corporation.

(2) Provision for extending the corporate existence of trust companies in the District of Columbia.

C. Bills have been introduced and are now before the Congress for consideration in connection with the following recommendations made in the annual report for 1935:

(1) Revision of the Code of Laws for the District of Columbia relating to building and loan associations.

(2) Provision for the transfer of jurisdiction of the credit unions chartered under the Code of Laws for the District of Columbia from the Comptroller of the Currency to the Farm Credit Administration, which has jurisdiction over the Federally chartered credit unions.

D. No action has been taken upon the following recommendations made in the 1935 annual report:

(1) Amendment of the provision relating to the payment of cash dividends by national banks upon their shares of common stock.

(2) Amendment of the provision relating to the capital requirements for the conversion of a State bank into the national banking system.

E. No additional recommendations for legislation were made in the 1936 report.

F. The Banking Act of 1933 prohibited member banks from making loans to their executive officers, and set a limit of time within which outstanding loans were to be repaid. In 1935, this time limit was extended to June 16, 1938. The only recommendation for legislation made in the present report is that the time be extended for another year, in view of the substantial reductions made in the amount of these outstanding obligations.

29. In accordance with the order issued by Hon. Henry Morgenthau, Jr., Secretary of the Treasury, on March 11, 1935, calling for redemption United States Panama Canal and Consolidated bonds which had the circulating privilege, and due to the expiration of the circulating privilege on certain other United States bonds, national bank notes amounting to \$612,962,150 have been retired. There is at present outstanding \$251,115,885 in such notes.

30. At the request of the Board of Governors of the Federal Reserve System, this Bureau issued \$5,879,660,000 in Federal Reserve notes from March 16, 1933, to October 31, 1937.

NATIONAL BANKS IN THE TRUST FIELD

The administration of trusts in the national banking system during the fiscal year ended June 30, 1937 reflected continued development of this important activity. The statistics reveal that 1,913 national banks had authority to exercise trust powers, with a combined capital of \$1,301,368,385, and banking assets of \$26,205,955,724, representing 36.10 percent of the number, 81.96 percent of the par value of capital, and 86.38 percent of the assets of all banks in the national banking system.

Trust departments had been established by 1,551 of these banks and 135,772 individual trusts were being administered with assets aggregating \$9,656,397,140. Seven hundred and seventy-two of these banks were also administering 15,983 corporate trusts and acting as trustees for note and bond issues amounting to \$10,570,032,665. Compared with 1936 these figures represent an increase of 2,930 in the number of individual trusts being administered; an increase of \$91,745,854 in the volume of individual trust assets under administration; a decrease of 1,014 in the number of corporate trusts, with a reduction of \$597,536,477 in the volume of note and bond issues outstanding under which national banks had been named to act as trustees.

Segregation of the number of fiduciary accounts in national banks revealed that 70,665 or 46.57 percent were those created under private or living trust agreements; 65,107 or 42.90 percent were trusts being administered under the jurisdiction of the courts and the remaining 15,983 or 10.53 percent were trusteeships under corporate bond or note-issue indentures. Private trust assets comprised \$7,788,959,078, or 80.66 percent, of the total assets under administration, while the remaining \$1,867,438,062 or 19.34 percent belonged to court trusts.

An analysis of the \$8,135,313,923 of invested trust funds belonging to private and court trusts under administration revealed that 48.95 percent were in bonds; 31.41 percent in stocks; 7.14 percent in real estate mortgages; 7.32 percent in real estate; and 5.18 percent consisted of miscellaneous assets.

The development of trust activities in national banks is emphasized by comparing the record in 1937 with that of 1933 which reflects an increase during the 4-year period of 40,615, or 36.54 percent in the number of trusts being administered; an increase of \$3,344,739,387, or 52.99 percent in the volume of individual trust assets under administration and an increase of \$151,605,728, or 1.46 percent in the volume of note and bond issues outstanding for which national banks were acting as trustees.

Growth in earnings from trust department operations has kept pace with the increased volume of trusts under administration, as revealed by the fact that during the fiscal year ended June 30, 1937 gross earnings aggregating \$33,779,000 were reported as against \$30,259,000 in 1936 and \$21,461,000 in 1933, representing a gain of \$3,520,000 or 11.63 percent over 1936 and an increase of \$12,318,000 or 57.40 percent over 1933.

Two hundred and ninety-nine national banks were acting as trustees under 1,213 insurance trust agreements involving \$55,705,783 in proceeds from insurance policies, while 702 national banks had been named to act as trustees under 16,259 insurance trust agreements not yet matured or operative supported by insurance policies with a face value aggregating \$639,827,330.

Four hundred and one of the banks spent \$244,465 during the year for trust advertising; 37 banks employed full-time trust solicitors, and 71 banks utilized the services of part-time trust solicitors.

The advertising value of including the words "Trust Company" in the title of a national bank having authority to exercise fiduciary powers is being recognized, as evidenced by the increasing number of such institutions availing themselves of this privilege, 279 banks having already obtained permission from this office to amend their titles in this respect.

Two hundred and forty-three banks were acting as transfer agents for 2,458 accounts involving \$2,185,212,186, and 369 banks were acting as registrars of stocks and bonds for 4,044 accounts involving \$4,477,638,034.

An analysis of the new trust accounts placed on the books of the national banks between June 30, 1936 and June 30, 1937, developed that 283 banks were named trustees for 1,089 bond and note issues aggregating \$887,908,901; 873 banks were named to act as individual trustees under 6,250 agreements involving \$345,634,961; 781 banks were named to act under 2,901 executorships involving \$204,857,152; 572 banks were named as administrators under 1,677 appointments involving \$24,092,583; 546 banks were named under 2,666 guardianships involving \$12,528,417; 17 banks were named to act as assignees in 45 instances involving \$2,268,823; 28 banks were named to act in 82 receiverships involving \$1,377,635; 140 banks were named to act as committee of estates of lunatics in 400 cases involving \$2,657,290, while 412 banks were named to act 6,546 times in miscellaneous fiduciary capacities other than those enumerated above, involving \$658,717,018.

One hundred and five banks were named to act as registrars of stocks and bonds in 348 cases involving \$444,840,088, while 77 banks were named to act as transfer agents in 362 instances involving \$100,221,679.

National-bank branches numbering 345 on June 30, 1937, were actively engaged in administering 12,843 trusts, with individual trust assets aggregating \$688,756,609, and were acting as trustees for outstanding note and bond issues amounting to \$262,558,097.

The following tables show in detail the activities of national banks in the trust field; segregated: First, according to capital of the banks; second, according to the population of places in which the banks were located; third, according to Federal Reserve districts and fourth, analysis of the type of investments held in trust, with a supplemental table showing the extent to which national-bank branches were furnishing trust service to the communities in which they were located.

NATIONAL BANK FAILURES¹

During the year ended October 31, 1937, there were but 4 actual failures of national banks. In addition to such 4 failures, receivers were, however, appointed for 7 other banks, making a total of 11 appointments of receivers for insolvent national banks during the year ended October 31, 1937. Of these total appointments, 7 were for the purpose only of completing unfinished business or enforcing stock assessments against shareholders of banks, the collection of which was necessary because of unsatisfied indebtedness of such institutions.

The liquidation of 341 receiverships was completed and the affairs of such receiverships finally closed during the year ended October 31, 1937. These 341 receiverships disposed of during the current year represent the largest number of terminations of receiverships in a like period during the history of the office of the Comptroller of the Currency. It is also found as a result of these receivership terminations in 1937, together with other final closings and additional banks placed in receivership period 1934 to 1936, that the largest number of active national bank receiverships in the history of the Comptroller's Office, of 1,568 as of July 19, 1934, had been reduced as of October 31, 1937, to 882.

In reporting upon the progress and results of liquidation of insolvent national banks for the year ended October 31, 1937, it has been possible to furnish data with respect to earnings of receivership banks during such period of liquidation, as derived from the accruals and collections of interest, premiums, rents, etc. As will be noted from these figures of earnings contrasted with expense of liquidation reported upon in detail in following paragraphs for various groups of banks in liquidation, the earnings of national bank receiverships approximate or exceed the amount of expenses incurred, contrary to the view often held that expenses of liquidation result in additional losses to depositors and creditors. In view of the approximately equal proportion of earnings to expenses resulting from the liquidation of insolvent national banks, it should be noted that depositors' equities in the assets of failed national banks are not materially reduced because of receivership operations.

Total costs incurred during the year ended October 31, 1937, in the liquidation of insolvent national banks, as reported by receivers are found to have been equivalent to 8.81 percent of total collections from all sources including offsets allowed. Such percentage of cost for the current year will be noted to represent a material decrease from the comparable percentage cost for the previous year of 10.27 percent. This decrease in percentage of annual liquidation cost is particularly gratifying in view of the increased average liquidation age of receiverships in process of liquidation during the period, combined with the well understood fact that the percentage of costs to collections is comparatively low during the early years of liquidation, but progres-

sively increases from date of failure to date of final closing. Also a considerable proportion of liquidation expense for the current year consisted of interest payments to the Reconstruction Finance Corporation and lending banks upon loans to receivers for dividend payment purposes. Such total interest payments by receivers to the Reconstruction Finance Corporation and lending banks, from the inception of such loans to October 31, 1937, as indicated by the records of this office, aggregated \$11,436,363, of which approximately \$1,031,254 was paid during the current year. Comparable data by years from 1933 to date as to total collections, total liquidation expense, interest payments, etc., are as follows:

Annual liquidation costs—national bank receiverships

¹ Including \$19,374 of interest paid in 1932, from date of inception of Reconstruction Finance Corporation dividend loan activity.

² Data unavailable as separate figure.

The decrease in percentage cost of liquidation expense during the current year is principally the result of the existing policy of this office in consolidating groups of receiverships under individual receivers, where the remaining asset values in such receiverships plus the additional efficiency and economies to be obtained thereby are found to warrant such consolidations. The effect of these consolidations of receiverships is well evidenced by the fact that a total of 833 receivers in charge of active national bank receiverships as of June 30, 1934, had been reduced to a total of but 367 as of October 31, 1937, with little or no increase in the average salary of individual receivers. This reduction in number of receivers in charge of active receiverships, together with corresponding economical consolidations in the field staff of receivers' clerks and assistants, resulted in the administration of an average of 2.4 receiverships per individual receiver as of October 31, 1937.

Every effort has been made by this office during the year ended October 31, 1937, to expedite the distribution of dividends to depositors and creditors of insolvent national banks and to complete the liquidation of insolvent national banks where remaining asset values in such banks have not warranted the further continuance of receivership operations. In addition to dividend payments resulting from the normal process of liquidation, Reconstruction Finance Corporation loans to receivers of insolvent national banks have been obtained to further expedite distributions to depositors. Reconstruction Finance Corporation commitments so obtained by receivers of insolvent national banks during the year ended October 31, 1937, as indicated

by the records of this office amounted to \$13,669,500, while cash advances or actual loans under existing commitments aggregated \$11,020,643. Total loan commitments obtained by receivers of insolvent national banks from the Reconstruction Finance Corporation from the date of its organization to October 31, 1937, as indicated by the records of this office amounted to \$494,495,500, while total cash advances drawn against such commitments aggregated \$389,399,367. Total Reconstruction Finance Corporation commitments outstanding and unpaid advances to receivers of insolvent national banks as of October 31, 1937, were according to the records of this office \$6,231,276 and \$8,900,735, respectively. This unpaid balance of loans represents a reduction in such item during the current year of \$13,012,867. Receivers' dividend loans from the Reconstruction Finance Corporation have been obtained at various interest rates ranging from 5 percent per annum as of January 30, 1932, to 3 percent as of October 31, 1937.

In addition to Reconstruction Finance Corporation loans to receivers, additional loans have been secured by receivers from commercial or lending banks to facilitate dividend payments to depositors. Lending bank loan commitments so obtained by receivers of insolvent national banks during the year ended October 31, 1937, as indicated by the records of this office amounted to \$12,761,460, while cash advances or actual loans obtained under existing commitments aggregated \$13,834,290. Total loan commitments obtained by receivers of insolvent national banks from commercial or lending banks to October 31, 1937, as indicated by the records of this office amounted to \$64,495,660, while cash advances or actual loans obtained under such commitments aggregated \$59,403,686. Total lending bank commitments outstanding and unpaid advances to receivers of insolvent national banks as of October 31, 1937, were according to the records of this office \$1,773,284, and \$5,451,453, respectively. This unpaid balance of loans represents a reduction in such item during the current year of \$22,849,300. Receivers' dividend loans from commercial or lending banks have been obtained at interest rates of from 2½ to 3 percent per annum, depending generally upon the size of loans obtained.

The continuation during the current year of liquidation procedure, first adopted in 1935, involving the disposal at public auction of real estate properties held by receivers has considerably facilitated the completion of liquidation and final closings of receiverships. This form of liquidation has been found very desirable in partially overcoming the constant problem of an advantageous disposal of the real-estate properties and equities of insolvent national banks. In addition to this disposition of property through public sale there has been, however, as a result of the reorganization of such activity by this office, a corresponding and very considerable increase in the volume of real-estate items disposed of through private sales negotiated by receivers and local real estate agents assisting in such activity.

Under the arrangement for disposition of real property assets of receiverships at public auction, sales are periodically held in desirable key localities following extensive display and other types of effective advertising. These real-estate auctions provide for the sale of real-estate properties held by numerous receiverships in the immediate and adjacent territories, subject, however, to formal approval and

acceptance by the Office of the Comptroller of the Currency. Such real-estate sales have now been held in numerous instances in several States both in the North and South with very gratifying results as to liquidation obtained, and it is planned to continue such liquidation procedure wherever existing circumstances indicate the desirability of such action. Figures relative to real-estate auction sales held and reported upon by receivers to October 31, 1937, are as follows:

Relative to the length of time required to complete liquidation of insolvent national banks a compilation has been made covering those insolvent national banks liquidated and finally closed during the year ended October 31, 1937, and for those receiverships finally closed during the 16-year period 1921 to October 31, 1937. From data compiled it has been found that insolvent national banks liquidated and finally closed during the year ended October 31, 1937, exclusive of those banks for which receivers were appointed for the purpose only of completing unfinished business or enforcing stock assessments, required an average period of 5 years and 2 months, with a minimum period of 2 years and 3 months, for liquidation. With reference to insolvent national banks, the affairs of which were finally closed during the 16-year period, 1921 to 1937, exclusive of those banks restored to solvency and banks for which receivers were appointed for the purpose only of completing unfinished business or enforcing stock assessments, the average period of liquidation is found to have been 5 years.

In following paragraphs will be found tables reflecting the progress and results of liquidation to date for various groups of insolvent national banks; those which have been completely liquidated from the date of the first national-bank failure in 1865 to date, those still in process of liquidation as of October 31, 1937, etc. These tables are supported by various schedules appearing in the appendix of the report furnishing in detail for each insolvent national bank in liquidation during the current year data as to progress and results of the receiver's administration thereof. It will be noted that the following paragraphs and tables combine data as to the liquidation of insolvent

national banks with that of insolvent District of Columbia State banks, but in such manner that figures for each group may be obtained separately if desired. This method of reporting upon these groups of banks is believed desirable by reason of the fact that liquidation of both national and District of Columbia State banks is uniformly administered under the supervision of the Comptroller of the Currency and normally combined in press and other releases of information by this office as to the progress and results of such liquidation.

Receiverships, year ended October 31, 1937

Of the 11 national banks for which receivers were appointed during the past year, none was restored to solvency, leaving the entire 11 banks to be administered by receivers. Of the 11 national banks so administered by receivers, 7 were placed in receivership for the purpose of completing unfinished business or enforcing stock assessments against shareholders because of unsatisfied indebtedness of such banks. There were, therefore, but 4 actual failures of national banks during the year ended October 31, 1937. The capital of these 11 insolvent national banks for which receivers were appointed was \$1,987,150.

Stock assessments levied by the Comptroller of the Currency to October 31, 1937, against shareholders of the 11 banks administered by receivers, with capital of \$1,987,150, amounted to \$1,232,500, while the assets of such banks, including assets acquired subsequent to their failure, totaled \$6,912,637. Collections from these assets, including earnings, offsets allowed, and collections from stock assessments as reported by receivers to September 30, 1937, amounted to \$2,555,502, or 31.37 percent of such assets and stock assessments. Total earnings collected by receivers from the assets of these banks, amounting to \$45,615, were \$32,864 in excess of total expenses incurred. These collections and the disposition thereof were as follows:

In addition to the above record, it is found that total claims proved, both secured and unsecured, as reported by receivers, aggregated \$4,610,792. Total deposits of these banks at date of failure amounted to \$4,025,004, while borrowed money consisting of bills payable, rediscounts, etc., totaled \$4,566,402.

Receiverships 1865-1937

From the date of the first failure of a national bank in the year 1865 to October 31, 1937, 2,950 national banks and 16 State banks or loan associations located in the District of Columbia have been placed in charge of receivers. Of this number, 157 have been restored to solvency and either reopened, sold to other institutions, or placed in voluntary liquidation. In addition to the 157 banks restored to solvency, 1 bank was eliminated as a receivership through revocation of the receiver's commission as of the date of issuance, leaving 2,808 receiverships to be administered by receivers. Of these receiverships so administered, 882 are still in process of liquidation and 1,926 have been completely liquidated and the affairs thereof finally closed.

The capital of these 2,966 insolvent national banks at date of failure, exclusive of the 1 bank eliminated through revocation of the receiver's commission, was \$400,900,595. The capital of the 157 banks that have been restored to solvency was \$22,950,000. The capital of the 882 banks that are still in process of liquidation was \$199,358,175, and the capital of the 1,926 banks that have been completely liquidated was \$178,592,420.

The aggregate book value of the assets of the 2,808 administered receiverships, including assets acquired after suspension, was \$3,694,230,852, in addition to which there have been levied against shareholders assessments aggregating \$327,961,187. Total collections from assets, including earnings, offsets allowed and collections from stock assessments as reported by receivers to September 30, 1937, amounted to \$2,537,512,381 or 63.09 percent of the total of such assets and stock assessments. These collections and the disposition thereof were as follows:

In addition to the above record of distribution, there have been returned to shareholders through their duly elected agents assets of a book value of \$30,213,323. Total claims proved, both secured and unsecured, as reported by receivers aggregated \$2,104,927,419. The outstanding circulation of these 2,808 receiverships at date of failure was \$170,762,785, secured by United States bonds on deposit with the Treasurer of the United States of the par value of \$180,725,531, while total deposits at date of failure amounted to \$2,369,826,369.

From the above it will be noted that the average percentage of all dividends paid on the aggregate of secured and unsecured claims, proved against the 2,808 administered receiverships, was 65.13 percent. If payments to secured and preferred creditors other than dividends, offsets allowed, and other disbursements as indicated above, were included with dividends paid in this calculation, such total disbursements to creditors would amount to 75.79 percent of claims proved plus other liabilities established.

Expenses incident to the administration of the 2,808 administered receiverships, consisting of receivers' and conservators' salaries, legal and other expenses, of \$144,026,846, plus unrecovered disbursements for the protection of assets in 1,926 receiverships completely liquidated and finally closed, of \$3,777,276, amounted to 3.67 percent of the book value of assets and stock assessments administered, or 5.82 percent of collections from assets and stock assessments, including offsets allowed. The assessments against shareholders averaged 86.77 percent of their holdings and total collections from such assessments as were levied amounted to 48.95 percent of the amount assessed.

Additional data with respect to the percentages of dividends paid in receiverships completely liquidated and finally closed or restored to solvency period 1865 to 1930, and by years 1931 to 1937, inclusive, and in receiverships still in process of liquidation as of October 31, 1937, have been compiled by dividend percentage groups, as follows:

The 882 national banks that were, as of October 31, 1937, still in charge of receivers and in process of liquidation had assets, including assets acquired subsequent to their failure, aggregating \$2,491,260,360. The capital of these banks was \$199,368,175, and assessments levied by the Comptroller of the Currency to October 31, 1937, against shareholders amounted to \$192,563,525. The collections from these assets, including earnings, offsets allowed and collections from stock assessments, as reported by receivers to September 30, 1937, amounted to \$1,730,417,025, or 64.48 percent of such assets and stock assessments. Total earnings collected by receivers from the assets of these banks amounting to \$103,702,602, were \$12,382,702, or 13.56 percent in excess of total expenses incurred. These collections and the disposition thereof were as follows:

Total.....	1,728,679,517	16,237,511	1,744,917,028

In addition to the above record, it is found that total claims proved, both secured and unsecured, as reported by receivers, aggregated \$1,431,139,516. The outstanding circulation of the 882 receiverships at date of failure was \$94,408,822, secured by United States bonds on deposit with the Treasurer of the United States of the par value of \$100,186,650. Total deposits of these banks at date of failure amounted to \$1,689,372,005, borrowed money consisting of bills payable, re-discounts, etc., \$335,350,750, and additional liabilities established to date, \$38,566,715.

From the above it will be noted that the average percentage of all dividends paid on the aggregate of secured and unsecured claims, proved against the 882 receiverships still in process of liquidation as of October 31, 1937, was 64.32 percent. If payments to secured and preferred creditors other than dividends, and offsets allowed, were

included with dividends paid in this calculation, such total disbursements to creditors would amount to 75.25 percent of total liabilities established to date.

Expenses incident to the administration of the 882 active receiverships, consisting of receivers' and conservators' salaries, legal and other expenses, amounted to \$91,319,900, or 3.40 percent of the book value of assets and stock assessments administered, or 5.28 percent of collections from assets and stock assessments, including offsets allowed. The assessments against shareholders averaged 96.59 percent of their holdings and total collections from such assessments as were levied amounted to 47.64 percent of the amount assessed.

Receiverships terminated, year ended October 31, 1937

During the year ended October 31, 1937, 341 receiverships were liquidated and finally closed. These 341 receiverships had assets, including assets acquired subsequent to their failure, aggregating \$250,162,101. The capital of these 341 banks was \$27,450,000, and assessments levied by the Comptroller of the Currency against shareholders amounted to \$25,945,000. The collections from these assets, including earnings, offsets allowed, and collections from stock assessments as indicated by receivers' final reports, amounted to \$177,686,544, or 64.35 percent of such assets and stock assessments. Total earnings collected by receivers from the assets of these banks amounted to \$8,815,869, or 72.61 percent of total expenses incurred. These collections and the disposition thereof were as follows:

In addition to the above record of distribution, there were returned to shareholders through their duly elected agents assets of a book value of \$7,580,789. Total claims proved, both secured and unsecured, as indicated by receivers' final reports, aggregated \$145,840,455. The outstanding circulation of these 341 closed receiverships at date

of failure was \$11,360,701, secured by United States bonds on deposit with the Treasurer of the United States of a par value of \$11,506,560. Total deposits of these banks at date of failure amounted to \$154,754,207, borrowed money consisting of bills payable, rediscounts, etc., \$41,278,219, and additional liabilities established to date of final closing \$5,065,597.

From the above it will be noted that the average percentage of all dividends paid on the aggregate of secured and unsecured claims proved against the 341 receiverships that were finally closed during the year ended October 31, 1937, was 70.44 percent. If payments to secured and preferred creditors other than dividends, and offsets allowed, were included with dividends paid in this calculation, such total disbursements to creditors would amount to 82.02 percent of total liabilities established to date of final closing.

Expenses incident to the administration of the 341 trusts, consisting of receivers' and conservators' salaries, unrecovered disbursements for the protection of assets, legal and other expenses, amounted to \$12,141,707, or 4.40 percent of the book value of the assets and stock assessments administered, or 6.83 percent of collections from assets and stock assessments, including earnings and offsets allowed. The assessments against shareholders averaged 94.52 percent of their holdings and total collections from such assessments as were levied amounted to 53.93 percent of the amount assessed.

Receiverships terminated 1865-1937

From the date of the first failure of a national bank in 1865 to the close of business October 31, 1937, 2,083 receiverships, including 3 District of Columbia State banks, have been administered and the trusts closed or the affairs thereof restored to solvency. Included in this number are 1 District of Columbia State and 156 national banks restored to solvency, none in 1937, and 341 banks the affairs of which were finally closed during the year 1937. In addition to these 2,083 administered receiverships disposed of, 1 receivership was eliminated without administration through revocation of the receiver's commission as of the date of issuance thereof. The 1,926 national banks administered by receivers had assets, including assets acquired subsequent to their failure, aggregating \$1,202,970,492. The capital of these 1,926 banks was \$178,582,420, and assessments levied by the Comptroller of the Currency against shareholders amounted to \$135,397,662. The collections from these assets including earnings, offsets allowed, and collections from stock assessments as indicated by receivers' final reports, amounted to \$807,095,356, or 60.30 percent of such assets and stock assessments. These collections and the disposition thereof were as follows:

In addition to the above record of distribution, there were returned to shareholders through their duly elected agents, assets of a book value of \$30,213,323. Total claims proved, both secured and unsecured, as indicated by receivers' final reports aggregated \$673,787,903. The outstanding circulation of these 1,926 closed receiverships at date of failure was \$76,353,963, secured by United States bonds on deposit with the Treasurer of the United States of a par value of \$80,538,881, while total deposits at date of failure amounted to \$680,454,364.

From the above it will be noted that the average percentage of all dividends paid on the aggregate of secured and unsecured claims proved against the 1,926 receiverships that have been finally closed, but not including the 157 restored to solvency which paid 100 percent was 66.85 percent. If payments to secured and preferred creditors other than dividends, offsets, and other disbursements as indicated above, were included with the dividends paid in this calculation, such total disbursements to creditors would amount to 76.94 percent of claims proved plus other liabilities established.

Expenses incident to the administration of the 1,926 closed trusts, consisting of receivers' and conservators' salaries, unrecovered disbursements for the protection of assets, legal and other expenses, amounted to \$56,484,222, or 4.22 percent of the book value of the assets and stock assessments administered, or 7 percent of collections

from assets and stock assessments, including earnings and offsets allowed. The assessments against shareholders averaged 75.82 percent of their holdings and total collections from such assessments as were levied amounted to 50.82 percent of the amount assessed.

Total liquidation operations, year ended October 31, 1937

Total receipts and disbursements of receivership funds incident to liquidation operations for the current year in all receiverships, as reported by receivers to September 30, 1937, were as follows:

UNLICENSED NATIONAL BANKS

Administration of unlicensed national banks, March 16, 1933, to October 31, 1937

The last conservatorship under the supervision of this office, incident to the banking holiday of March 1933, was terminated on February 6, 1935, and there have been no unlicensed national banks, as such, to be reorganized or otherwise disposed of since that date. However, in the year ended October 31, 1937, unsecured liabilities of these banks released and made available to creditors amounted to \$42,077,-776, or 2.19 percent, of the total of such liabilities outstanding on March 16, 1933.

The summaries and tables following have reference to the administration of all unlicensed banks in charge of the Comptroller since March 16, 1933.

As indicated in previous reports, there were 1,417 national banks, including 10 nonnational banks in the District of Columbia, placed on a restricted basis as of March 16, 1933, the close of the banking holiday, 312 of which were reorganized or otherwise eliminated without the appointment of conservators. These 1,417 banks had total assets as of December 31, 1932, for the nonconservator banks, and as shown by conservators' first reports of condition, in the sum of \$2,687,402,137, capital of \$198,457,820, borrowed money of \$212,627,465, and total deposits of \$1,971,960,022. Their total unsecured liabilities were \$1,922,698,738, of which \$1,562,739,935, or 81.28 percent, has been made available to creditors in the period from March 16, 1933, to October 31, 1937.

The reports showing the administration of the 1,417 banks have been segregated into five major groups: First, banks licensed after capital corrections; second, banks reorganized by waiver or rehabilitation; third, banks reorganized by Spokane sale; fourth, banks placed in voluntary liquidation; and fifth, banks placed in receivership, plans for reorganization having been disapproved.

The first group, comprising 292 banks which were licensed after capital corrections, had unsecured liabilities at the holiday of \$305,-638,919, all of which had been released to creditors prior to July 11, 1933.

In the second group are 565 banks, with unsecured liabilities of \$594,604,830, which were reorganized by waiver or rehabilitation. These banks have made available to creditors \$507,325,348, or 85.32 percent, of the liabilities mentioned. Included in this group are 17 associations, absorbed by other national banks, which have released 82.13 percent of their unsecured liabilities; 18, absorbed by State banks, which have released 91.83 percent; 282, reopened under new charters, which have released 79.60 percent; and the remainder, or 248 banks, reopened under their old charters, have released 91.41 percent.

The third group consists of 257 banks, with unsecured liabilities of \$882,901,854, which were reorganized under the so-called Spokane sale plan. These associations have made available to creditors \$662,491,370, or 75.04 percent, of such liabilities. Twenty-one of the banks were absorbed by other associations, releasing 85.56 percent, while the remaining 236, which were reopened under new charters, have released 74.79 percent of their unsecured liabilities.

The fourth group is made up of 13 banks, with unsecured liabilities totaling \$1,343,597, which were placed in voluntary liquidation, having made available for release 100 percent of such liabilities.

The fifth and last group comprises 290 banks which were placed in receivership following disapproval of plans submitted for reorganization. These banks at the close of the holiday had unsecured liabilities of \$138,209,538, of which amount \$85,940,701, or 62.18 percent, has been made available by receivers for release to creditors.

The table following shows a summary of unlicensed national banks and nonnational banks in the District of Columbia on March 16, 1933, and unsecured liabilities released to October 31, 1937, grouped in accordance with final disposition.

ORGANIZATION AND LIQUIDATION OF NATIONAL BANKS

At the close of the current year, October 31, 1937, there were in existence 5,290 national banking associations having authorized common capital stock amounting to \$1,297,129,756. These figures included suspended banks and banks that had ceased business but had not gone into voluntary liquidation, and so remained technically in existence. During the year ended October 31, 1937, there was a reduction of 82 in the number of national banks, or a fraction over 1 percent, and a net increase of \$28,706,020 in the amount of authorized common capital stock, or a fraction over 2 percent of the total at the beginning of the year. During this same period, there was a net decrease of \$62,316,265.24 in the amount of outstanding preferred capital stock issued by national banks under the provisions of the act of March 9, 1933, so that the total amount outstanding at the close of the period was \$289,604,020.01. The net result was a reduction of \$33,610,245.24 in the aggregate capital stock of all national banks for the year ended October 31, 1937.

During the current year, there was an aggregate increase of \$35,-199,395 in the common capital stock of 790 national banks. Of this number 37 banks effected an increase of \$5,086,100 by stock dividends pursuant to the provisions of section 5142, U. S. R. S. Coincident with retirement of preferred capital stock 673 banks effected an increase in their common capital stock of \$22,407,545 by stock dividends declared by their respective boards of directors pursuant to the requirements of their articles of association; 62 banks issued an aggregate of \$6,669,050 of additional common capital stock for cash; and 18 banks effected an aggregate increase of \$1,036,700 through conversion of preferred capital stock to common capital stock. Also, during the period under review, 19 banks issued preferred capital stock aggregating \$1,917,250 of which \$1,308,250 was sold to the Reconstruction Finance Corporation and the remainder, \$609,000, to other purchasers, usually shareholders of the issuing banks.

Covering the entire period since the inception of the national banking system, February 25, 1863, to and including October 31, 1937, 14,394 national banking associations have been authorized to begin business. Of these banks 5,907 have gone into voluntary liquidation in the manner provided by sections 5220 and 5221, U. S. R. S., paid their depositors and quit business or merged with other national and State banks; and 404 have consolidated with other national banking associations under authority of the act of November 7, 1918. Exclusive of banks which failed but subsequently were restored to solvency, loss to the national banking system since its inception through receiverships has been 2,793. Thus, the number of receiverships has been about 19 percent of the total number of banks organized.

During the year ended October 31, 1937, 98 national banks with aggregate common capital stock of \$8,188,500, among which were 37 with preferred capital stock aggregating \$2,861,040, went into voluntary liquidation in the manner provided by sections 5220 and 5221,

U. S. R. S. Of these banks 8 with common capital stock of \$300,000 and aggregate assets of \$2,607,896, including 2 with preferred capital stock aggregating \$40,000, paid their depositors and quit business; 59 with common capital stock of \$4,208,500 and aggregate assets of \$76,275,206, including 24 with preferred capital stock aggregating \$1,154,840, were succeeded by other national banks; 31 with common capital stock of \$3,680,000 and aggregate assets of \$94,996,089, including 11 with preferred capital stock aggregating \$1,666,200, were succeeded by State banks. The last-mentioned group included 2 banks with capital stock of \$500,000 or more with an aggregate of \$2,100,000 common capital stock, \$1,399,900 preferred capital stock, and assets of \$73,107,668.

November 2, 1914, marked the beginning of the operation of the Federal Reserve System. At that date, there were in existence 7,578 national banks with aggregate common capital stock of \$1,072,-492,175 as compared with the total common capital stock of \$1,297,-129,756 for the 5,290 national banks in existence October 31, 1937. In addition, 2,265 national banks as permitted by the act of March 9, 1933, have issued preferred capital stock, 1,817 of which had an aggregate of \$289,604,020.01 outstanding at the close of the current year. Since 1914, there has been a net decrease of 2,288 in the number of national banks in existence but a net increase of \$224,637,581 in the amount of common capital stock, and, in addition, a net increase of \$289,604,020.01 in capital through the issuance of preferred capital stock during the last 4½ years. During this 23-year period, 3,742 new national banks have been chartered, with aggregate common capital stock of \$560,041,600 and preferred capital stock of \$55,199,-300, while 6,030 associations have been closed voluntarily or otherwise.

During the year ended October 31, 1937, in addition to applications carried over from the previous year, 52 applications were received to organize national banks and to convert State banks into national banking associations, with proposed capital stock aggregating \$8,600,000. Of these applications, 33 with proposed capital stock aggregating \$5,775,000 were approved; 7 with proposed capital stock aggregating \$800,000 were rejected; and the remainder are still pending or have been abandoned. During the year 10 of the applications approved were for the organization of new national banking associations which would not acquire all or a part of the business of some other bank. From the applications carried over from the previous year and the 33 applications approved during the current year, 29 national banking associations with common capital stock aggregating \$5,225,000, 4 of which also had \$130,000 preferred capital stock, were authorized to commence business. Of these 29 banks, 1 was located in the Eastern States, 9 in the Southern States, 13 in the Middle Western States, 5 in the Western States, and 1 in the Pacific States.

It further appears that of the 29 charters issued within the year ended October 31, 1937, 18 with common capital stock aggregating \$4,455,000 and assets aggregating \$93,112,719 were the result of conversions of State banks; 1 with common capital stock of \$10,000 and preferred capital stock of \$40,000 was a reorganization of a State bank; 2 with common capital stock of \$35,000 and preferred capital stock of \$65,000 were organized for the purpose of acquiring the business of 2 liquidating national banks; and 8 with common capital stock of \$750,000 did not acquire the business of any other

banking institution as of date of charter. The business of 39 State banks with aggregate capital stock of \$2,551,300 and aggregate assets of approximately \$37,774,249 were purchased by national banks.

During the year ended October 31, 1937, 17 national banks and 1 State bank were consolidated into 9 national banking associations, under authority of the act of November 7, 1918, as amended February 25, 1927, the common capital stock of the consolidated banks being \$2,382,125 and the preferred capital stock being \$453,000. In two of these consolidations there were increases in the capital stock while in five there were reductions in the capital stock, the net result being a reduction in the common capital stock of \$277,875 and an increase of \$106,000 in the preferred capital stock. Additional assets of approximately \$1,297,419 were brought into the national system by reason of the State bank which was consolidated with a national bank.

BRANCHES

On February 25, 1927, the date of the passage of the McFadden Act, 118 national banking associations had in operation 372 branches as compared with 192 national banking associations with 1,546 branches as of October 31, 1937.

Covering the entire period from February 25, 1927, to and including October 31, 1937, 2,013 branches have been added to the system. Of these branches 1,190 were de novo branches, 313 were branches of State banks which converted into national associations, and 510 were branches brought into the system by the consolidation of State banks with national banks. During this same period, 839 branches were relinquished, 564 went out of the system through liquidation of the parent institutions, and 275 through consolidations or for other reasons. The net result of these operations was a gain for the system of 1,174 branches since February 25, 1927.

During the year ended October 31, 1937, there was a net gain of 86 in the number of authorized branches, 110 de novo branches being established, 96 of which were authorized under the Banking Act of 1933 to operate in places other than the city in which the parent bank is located. Nine branches were discontinued by reason of liquidation of the parent bank, while 15 were discontinued through action of the board of directors or shareholders of the parent bank.

There follows a summary of branch-banking operations in the national system during the period discussed in the foregoing:

NATIONAL-BANK CIRCULATION

With the expiration of the 3-year privilege, provided by the act of July 22, 1932, authorizing national banks to deposit as security eligible for circulating notes United States bonds bearing interest at a rate not exceeding 3% percent per annum, and the call for redemption of the 2-percent consols and Panama Canal 2-percent bonds on July 1 and August 1, 1935, respectively, the privilege of issuing circulation by such banks was discontinued.

A detailed reference to the history and development of the national-bank note was made on pages 817 to 842 of the Comptroller's annual report for 1935, and nothing further on the subject is referred to in this report, except the amount of national-bank notes of each denomination still outstanding on July 1, 1937, and reference to the amount and cost of national-bank notes retired in the year ended June 30, 1937.

¹ Represents aggregate of capital stock, surplus, undivided profits and reserves. In the years 1899-1933, inclusive, the amount of capital stock included in capital funds consists of the par value thereof, whereas subsequent to 1933 only the book value of capital stock is included in capital funds.

² Includes \$9,659,000 interest on investments and interest on balances with other banks, which was not reported separately by several banks. Report forms used prior to July 1, 1926, called for all interest items to be shown in one amount.

³ Includes \$19,360,000 interest on demand and time deposits and borrowed money, which was not reported separately by several banks. Report forms used prior to July 1, 1923, called for all interest items to be shown in one amount.

⁴ Included with "Other current earnings."

⁵ Deficit.

⁶ Revised figures.

⁷ 6 months ended June 30, 1936, when first called for separately.

⁸ Amounts paid to officers, as distinguished from employees other than officers, and the number of officers and employees were first called for separately in the 6-month period ended June 30, 1936. Figures showing the number of officers and employees represent the number of salaried officers and the number of full-time and part-time employees other than officers on the pay roll at the end of the period.

⁹ 6 months ended June 30, 1936. Such profits in period from July 1, 1932, to Dec. 31, 1935, were not called for separately but were included with recoveries on bonds, stocks, and other securities.

¹⁰ Includes stock dividends of \$50,000.

¹¹ Includes stock dividends of \$710,000.

¹² Includes stock dividends of \$2,243,000.

¹³ Includes stock dividends of \$7,342,000.

¹⁴ Includes stock dividends of \$30,141,000.

NOTE.—Gross earnings, expenses, and losses were not called for separately prior to 1888. Recoveries were not called for separately prior to 1918. The number of banks, capital, surplus, and capital funds used in this table are as of end of period. Earning and dividend reports were not required prior to 1869.

The figures compiled and furnished by the manager of the New York Clearing House Association for the year ended September 30, 1937, disclose there were 21 banks comprising the New York Clearing House Association with capital of \$523,547,000.

Clearings amounted to \$194,891,611,115, an increase in the year of \$8,401,347,332, and balances reported aggregating \$28,975,696,772 showed an increase in the year of \$2,712,641,704. The average daily clearings amounted to \$645,336,461, and the average daily balances \$95,946,016. The percentage of balances to clearings was 14.86.

CLEARING-HOUSE ASSOCIATIONS IN THE 12 FEDERAL RESERVE BANK CITIES AND ELSEWHERE

Clearing-house transactions in the 12 Federal Reserve bank cities during the year ended September 30, 1937, aggregated \$278,961,-274,000, an increase in the year of \$17,949,357,000. The ratio of bank clearings in the 12 Federal Reserve bank cities was 78.01 percent of the total clearings of all banks in 268 reporting cities in the United States, in comparison with a ratio of 79.38 percent reported for the year previous.

Clearings of banks in 20 other principal cities, each of which had clearings in excess of \$1,000,000,000, amounted to \$51,386,947,000 and showed an increase of \$6,825,337,000 over clearings reported for the same cities in the preceding year. The total clearings of the 268 cities reporting to the New York Clearing House Association in the current year aggregated \$357,587,604,000, as compared with \$328,-797,129,000 reported by these cities in the preceding year.

Tables showing the following information are published in the appendix of this report: Statement showing the total of transactions of the New York Clearing House from 1854 to 1913, and annually since 1914; exchanges, balances, and percentages of balances to exchanges by the New York Clearing House, annually since 1914; exchanges of the reporting clearing houses of the United States for each year ended September 30, 1914 to 1937; comparative statement of the exchanges of clearing houses of the United States, by cities, for years ended September 30, 1937 and 1936; and comparative statement of transactions of clearing-house associations in the 12 Federal Reserve bank cities and elsewhere in years ended September 30, 1937 and 1936.

ALL ACTIVE BANKS IN THE UNITED STATES AND POSSESSIONS

It has been customary in the past for the Comptroller to obtain summaries of the returns of all banks other than national in the country for but one date each year, namely, June 30, which together with the reports of national banks made it possible to include in his annual reports to Congress the consolidated returns of all classes of banks for that date. In the year 1936, however, summaries of all banks were also obtained for the first time as of December 31. The figures shown in the following statement reflect the assets and liabilities of all banks in the United States and possessions as of the latter date. (Summaries by States and classes of banks are published in the appendix of this report.)

² The common capital stock reported for banks other than national represents the par value of such stock. In the case of national banks, however, the common capital shown represents the net book value. The par value of common capital stock of national banks on June 30, 1937, aggregated \$1,283,749,000.

The following table shows the approximate population of each State, number of active banks, assets and liabilities, a classification of loans and discounts, investments, capital and demand and time deposits, June 30, 1937. ² Includes Home Owners' Loan Corporation 4-percent bonds, guaranteed by the United States as to interest only, the amount of which was not called for separately.

³ Includes cash items not in process of collection.

⁴ Dividends declared but not yet payable in 1932 were included with reserve for contingencies and in 1933 and 1934 with "Other liabilities." Amounts set aside for dividends not declared were not segregated from reserves for contingencies prior to 1935.

⁵ Includes reserves for dividends.

Banks other than national

The cooperation of the Board of Governors of the Federal Reserve System, the Federal Deposit Insurance Corporation, and the Banking Departments of Alaska, the insular possessions, and the several States of the Union make it possible for the Comptroller, as the law requires, to present statistics in this report relating to active banks other than national banking associations. In the statement following and in other statements of the report, figures showing assets and liabilities of loan and trust companies and stock savings banks are combined with figures for State commercial banks.

Upon the assumption that differences in their names indicated pronounced differences in the nature of their business activities, the assets and liabilities of the institutions named have been shown separately in previous annual reports. In former times material differences may have existed. In these days, however, many loan and trust companies and most stock savings banks receive deposits subject to check and make loans in much the same manner and upon much the same security that State commercial banks do. In some States commercial banks without the word "Trust" in their title exercise trust powers. It is well known, of course, that practically all State commercial banks pay interest upon time deposits or operate savings departments. The result is that although trust companies and savings banks in some States may enjoy corporate powers that enable them, should they desire, to limit their activities to fields that cannot be invaded by State commercial banks, they do not generally do so. Instead, such institutions for the most part have broadened their activities to include general banking and, moreover, have seen their own fields encroached upon by State banks organized primarily to do a commercial banking business. It is because of the foregoing considerations that figures for loan and trust companies, stock savings banks, and State commercial banks are again being combined in this report, which practice was begun in 1936.

Although the foregoing remarks to some extent may apply to private banks and to mutual savings banks, figures showing the assets and liabilities of such institutions will be reported separately as heretofore.

⁴ Includes reserves for dividends.

In the preceding summary, showing the assets and liabilities of private banks as of June 30 each of the 5 years 1933 to 1937, there are shown for the years 1936 and 1937 only the returns of associations which were doing business under the supervision of State authorities.

Section 21 (a) of the Banking Act of 1933 provided, in part, that after June 16, 1934, private banks not under State supervision would be required to submit to periodic examination by the Comptroller of the Currency or by the Federal Reserve bank, also to make to the Comptroller and publish periodic reports of condition the same as required of national banks.

However, under section 303 of the Banking Act of 1935, section 21 (a) of the Banking Act of 1933 was amended to provide that it shall be unlawful for private banks to operate unless they—

(A) shall be incorporated under, and authorized to engage in such business by the laws of the United States or of any State, Territory, or District; or

(B) shall be permitted by any State, Territory, or District to engage in such business and shall be subjected by the law of such State, Territory, or District to examination and regulation; or

(C) shall submit to periodic examination by the banking authority of the State, Territory, or District where such business is carried on and shall make and publish periodic reports of its condition, exhibiting in detail its resources and liabilities, such examination and reports to be made and published at the same times and in the same manner and under the same conditions as required by the law of such State, Territory, or District in the case of incorporated banking institutions engaged in such business in the same locality.

It will be noted from the foregoing that private banks are no longer required to submit to examination by the Comptroller of the Currency or the Federal Reserve bank, nor are they required to make to the Comptroller and publish periodic reports of condition. The last condition reported rendered to the Comptroller by private banks was as of June 1935.

Building and loan associations in the District of Columbia

The assets of the 27 building and loan associations operating in the District of Columbia under the supervision of the Comptroller of the Currency on June 30, 1937, totaled \$117,840,000 and exceeded by \$5,238,000 the assets of 28 associations on June 30 a year ago.

The loans, which aggregated \$108,903,000, showed an increase in the year of \$6,128,000. Installment payments on shares increased also from \$99,688,000 to \$103,631,000.

Twenty-two of the associations operated on the permanent plan, four on the serial plan, and one on both the permanent and serial plans. The total membership was 126,759, as compared to 133,679 members a year ago, and of the total in the current year the numbers borrowing and nonborrowing were 30,305 and 96,454, respectively.

The following statement discloses the number of building and loan associations in the District of Columbia, their aggregate loans, installments paid on shares, and total assets on June 30 each year 1914-37. (Summaries of the assets and liabilities of the individual associations on or about June 30, 1937, together with consolidated statements of assets and liabilities and receipts and disbursements for the 6-month periods ended Dec. 31, 1936, and June 30, 1937, are published in the appendix of this report.)

¹ Sec. 201 (e) of the Emergency Relief and Construction Act of 1932, provides that all expenses incurred in connection with the operation of the regional agricultural credit corporations shall be paid by the Reconstruction Finance Corporation. Under the provisions of this act the Corporation has allocated \$16,885,778.64 for such expenses.

² Title II of the "Emergency Appropriation Act, fiscal year 1935," approved June 19, 1934, provides: " * * * That not exceeding \$500,000,000 in the aggregate of any savings or unobligated balances in funds of the Reconstruction Finance Corporation may, in the discretion of the President, be transferred and applied to the purposes of the Federal Emergency Relief Act of 1933 and/or title II of the National Industrial Recovery Act, * * * " Under this act \$500,000,000 has been transferred to the Federal Emergency Relief Administration.

³ The Emergency Relief Appropriation Act of 1935, approved Apr. 8, 1935, provides: "That in order to provide relief, work relief, and to increase employment by providing for useful projects, there is hereby appropriated, * * * to be used in the discretion and under the direction of the President, to be immediately available and to remain available until June 30, 1937, * * * not exceeding \$500,000,000 in the aggregate of any savings or unexpended balances in funds of the Reconstruction Finance Corporation * * * " \$500,000,000 has been disbursed by the Corporation under these provisions of the act.

⁴ Sec. 2 of the Reconstruction Finance Corporation Act, as amended, provides that "in order to enable the Secretary of the Treasury to make payments upon stock of Federal Home Loan banks subscribed for by him in accordance with the Federal Home Loan Bank Act, the sum of \$125,000,000 or so much thereof as may be necessary for such purpose is hereby allocated and made available to the Secretary of the Treasury * * * " The amount of such stock subscribed for by the Secretary of the Treasury is \$124,741,000.

⁵ Sec. 4-b of the Home Owners' Loan Act of 1933, provides that to enable the Secretary of the Treasury to make payments for subscriptions by him to the capital stock of the Home Owners' Loan Corporation the Reconstruction Finance Corporation shall allocate and make available to the Secretary of the Treasury the sum of \$200,000,000 or so much thereof as may be necessary. The amount of such stock subscribed for by the Secretary of the Treasury is \$200,000,000 and this amount has been paid to him.

⁶ Sec. 30 (a) of the Emergency Farm Mortgage Act of 1933, as amended, made \$100,000,000 available to the Farm Loan (now Land Bank) Commissioner for loans to joint-stock land banks, of which \$2,600,000 has been paid to him. Sec. 32 of the same act made \$200,000,000 available to the Farm Loan (now Land Bank) Commissioner for direct loans to farmers, of which \$145,000,000 was paid to the Land Bank Commissioner and the remaining \$55,000,000, reallocated and paid to the Federal Farm Mortgage Corporation under sec. 3 of the Federal Farm Mortgage Corporation Act.

⁷ Sec. 4 of the National Housing Act provides that "the Reconstruction Finance Corporation shall make available to the Administrator such funds as he may deem necessary." Pursuant to this act \$51,121,074.55 has been paid to the Federal Housing Administrator.

⁸ Sec. 2 of the Reconstruction Finance Corporation Act, as amended, made available to the Secretary of Agriculture \$200,000,000. Of this amount \$35,000,000 was paid to him of which \$20,000,000 was returned to the Corporation. Of the \$85,000,000 then held by the Corporation, \$44,500,000 was reallocated and disbursed as capital of the regional agricultural credit corporations (sec. 201 (e) Emergency Relief and Construction Act of 1932). The remainder, \$40,500,000, was made available and has been paid to the Governor of the Farm Credit Administration, pursuant to the provisions of sec. 5 (a) (1) of the Farm Credit Act of 1933.

⁹ Loans under sec. 5 of the Reconstruction Finance Corporation Act, as amended, to aid in the reorganization or liquidation of closed institutions have been authorized in the aggregate amount of \$1,303,261,271.78, of which \$304,533,068.91 has been canceled. After taking into consideration repayments of \$846,970,060.31 items (10) of the balance sheet include the balance of \$81,965,368.32 representing proceeds disbursed (less repayments) and \$60,792,774.24 representing proceeds not yet disbursed, exclusive of a \$25,000 loan approved in principle upon the performance of specified conditions.

¹⁰ Represents undisbursed portion of estimated expenses of the regional agricultural credit corporations for the fiscal year ending June 30, 1938.

In addition to loans and other authorizations reflected on the statement of condition, the Corporation has approved in principle, upon the performance of specified conditions, loans in the amount of \$163,724,284.65, purchases of preferred stock and debentures in the amount of \$36,117,430.41, and purchase of stock of a mortgage company in the amount of \$10,000,000. The Corporation has also agreed to purchase from the Federal Emergency Administration of Public Works at par and accrued interest such part of securities having aggregate par value of \$44,673,000 as may be available for delivery.

Under the provisions of section 5 (b) of an act approved June 16, 1934 (Public, No. 362, 73d Cong.), the Corporation is required to purchase debentures or other obligations of the Federal Deposit Insurance Corporation, upon its request, up to but not exceeding \$250,000,000. The Corporation has not been called upon to purchase any such obligations.

This statement of condition does not take into consideration expenditures incurred but not paid by the Corporation at the close of business June 30, 1937, nor income of regional agricultural credit corporations whose capital stock was subscribed by the Corporation

Loans to aid in the reorganization or liquidation of closed banks and trust companies from Feb. 2, 1932, to June 30, 1937, inclusive, by States (includes loans to receivers, liquidating agents, and conservators, and loans through mortgage loan companies to aid in the reorganization or liquidation of closed banks, under sec. 5 of the Reconstruction Finance Corporation Act, as amended; and loans on the assets of closed banks and trust companies under sec. 5e of the Reconstruction Finance Corporation Act, as amended)

Joint-stock land banks

On June 30, 1937, there were 40 joint-stock land banks in operation, 3 in voluntary liquidation, and 5 in process of liquidation through receivership. A consolidated statement of condition of the active banks on the date indicated was not compiled by the Farm Credit Administration, although individual statements of such banks, as well as the banks in process of liquidation through receivership, are available.

The Emergency Farm Mortgage Act of 1933, approved May 12, 1933, provided that "After the date of enactment of this act, no joint-stock land bank shall issue any tax-exempt bonds or make any farm loans except as are necessary and incidental to the refinancing of existing loans or bond issues or to the sale of any real estate now owned or hereafter acquired by such banks." The act in effect prohibits joint-stock land banks from acquiring new business and restricts them to the orderly liquidation of their existing assets. Sections 30 and 31 of the Emergency Farm Mortgage Act of 1933, as amended by the Farm Credit Act of 1935, as a means of expediting the required liquidation, authorized and directed the Reconstruction Finance Corporation to make available to the Land Bank Commissioner until May 13, 1937, the sum of \$100,000,000 to be used for the purpose of making loans to the joint-stock land banks organized and doing business under the Federal Farm Loan Act, as amended, at a rate of interest not to exceed 4 percent per annum, payable annually.

NOTES

Act of Feb. 25, 1863, provided for reports of condition on the first of each quarter, before commencement of business.

Act of June 3, 1864—First Monday of January, April, July, and October, before commencement of business, on form prescribed by Comptroller (in addition to reports on first Tuesday of each month showing condition at commencement of business in respect to certain items; i. e., loans, specie, deposits, and circulation).

Act of Mar. 3, 1869, not less than 5 reports per year, on form prescribed by Comptroller, at close of business on any past date by him specified.

Act of Dec. 28, 1922, minimum number of calls reduced from 5 to 3 per year.

Act of Feb. 25, 1927, authorized a vice president or an assistant cashier designated by the board of directors to verify reports of condition in absence of president and cashier.

Act of June 16, 1933, requires each national bank to furnish and publish not less than 3 reports each year of affiliates other than member banks, as of dates identical with those for which the Comptroller shall during such year require reports of condition of the bank. The report of each affiliate shall contain such information as in the judgment of the Comptroller shall be necessary to disclose fully the relations between the affiliate and the bank and to enable the Comptroller to inform himself as to the effect of such relations upon the affairs of the bank.

Sec. 21 (a) of the Banking Act of 1933 provided, in part, that after June 16, 1934, it would be unlawful for any private bank not under State supervision to continue the transaction of business unless it submitted to periodic examination by the Comptroller of the Currency or the Federal Reserve bank of the district, and made and published periodic reports of condition the same as required of national banks under section 5211, U. S. R. S. Sec. 21 (a) of the Banking Act of 1933, however, was amended by section 303 of the Banking Act of 1935, approved Aug. 23, 1935, under the provisions of which private banks are no longer required to submit to examination by the Comptroller or Federal Reserve bank, nor are they required to make to the Comptroller and publish periodic reports of condition. (5 calls for reports of condition of private banks were made by the Comptroller, the first one for June 30, 1934, and the last one for June 29, 1935.)

¹ Total of amounts due from banks in the United States, except private banks and American branches of foreign banks (subject to immediate withdrawal), cash items in process of collection, including items forwarded to Federal Reserve banks and exchanges for clearing house, the aggregate of which since Aug. 23, 1935, the date of the enactment of the Banking Act of 1935, is deductible from gross demand deposits in computing reserves required under sec. 19 of the Federal Reserve Act. The difference between the figures shown in this column and the figures shown against the corresponding captions under "Assets" of member banks is accounted for by an excess of allowable deductions over gross demand deposits at 24 banks in 9 States.

² Reserves actually required are based on deposits at opening of business. The figures in this column, therefore, represent the reserves required to be maintained on the business day following the call date.

¹ Demand deposits including gross deposits of other banks reported by banks having excess of amounts due to banks over amounts due from banks, exclusive of reserve with approved Reserve agents as shown by individual bank reports. This amount, however, excludes deposits of public moneys by the United States in designated nonmember banks, the amounts of which are exempted from Reserve requirements.

⁴ The cash in vault and due from approved Reserve agents.

¹ Including school, irrigation, drainage, and reclamation districts, and instrumentalities of 1 or more States.

² Includes bonds, notes, and debentures of public utilities, real estate, and other domestic corporations.

NOTE.—The amounts shown in the schedules of loans and discounts, investments and deposits of this table do not agree in all particulars with figures as reported to this office, due to the fact that several of the classifications furnished were incomplete. In such cases estimates of various amounts have been used, based on classifications reported to the Federal Deposit Insurance Corporation in its call made for June 30, 1937, on insured State banks and trust companies not members of the Federal Reserve System.

¹ Including school, irrigation, drainage, and reclamation districts, and instrumentalities of one or more States.

² Includes bonds, notes, and debentures of public utilities, real estate, and other domestic corporations.

NOTE.—The amounts shown in the schedules of loans and discounts, investments and deposits of this table do not agree in all particulars with figures as reported to this office, due to the fact that several of the classifications furnished were incomplete. In such cases estimates of various amounts have been used, based on classifications reported to the Federal Deposit Insurance Corporation in its call made for June 30, 1937, on insured State banks and trust companies not members of the Federal Reserve System.

⁷ Composed of banks and trust companies in Ansonia, Derby, Seymour, and Shelton, Conn.

NOTE.—The above figures do not show the amount of clearing-house exchanges in 1937 for clearing houses in 3 cities for which exchanges were reported in 1936. This is due to the fact that the New York Clearing House has been unable to obtain figures for such cities at the date of this report.

¹ Figures for State and private banks, compiled by the Board of Governors of the Federal Reserve System, comprise (a) banks not licensed following the banking holiday and later placed in liquidation or receivership, and (b) unlicensed banks granted licenses after June 30, 1933. In the case of national banks the figures shown represent only 290 (288 national banks and 2 banks other than national in the District of Columbia) of the 1,417 unlicensed banks (1,407 national and 10 other than national in the District of Columbia) at the close of the banking holiday, which were placed in receivership because plans submitted for reorganization had been disapproved. The remaining 1,127 unlicensed banks (1,119 national and 8 other than national in the District of Columbia), which are not included with bank suspensions, were disposed of as indicated in the summary and table on pp. 62 to 65 of this report.

² Banks other than national, receivers for which were appointed by the Comptroller of the Currency.

¹ Estimated.

² Revised.

³ Includes 2 national banks (1 in Maryland and 1 in South Carolina) with capital of \$150,000 and deposits of \$1,234,000, receivers for which were appointed between Mar. 6 and Mar. 12, inclusive, the banking holiday.

⁴ Includes 4 banks other than national in the District of Columbia, receivers for which were appointed by the Comptroller of the Currency.

⁵ Figures for State and private banks comprise (a) banks not licensed following the banking holiday and later placed in liquidation or receivership, and (b) unlicensed banks granted licenses after June 30, 1933. In the case of national banks the figures shown represent only 290 (288 national banks and 2 banks other than national in the District of Columbia) of the 1,417 unlicensed banks (1,407 national and 10 other than national in the District of Columbia) at the close of the banking holiday, which were placed in receivership because plans submitted for reorganization had been disapproved. The remaining 1,127 unlicensed banks (1,119 national and 8 other than national in the District of Columbia) which are not included with bank suspensions, were disposed of as indicated in the summary and table on p. 62 to 65 of this report.

NOTE.—Figures for State and private banks since 1920 compiled by Board of Governors of the Federal Reserve System, and represent associations closed to the public, either temporarily or permanently, by supervisory authorities or directors of the banks on account of financial difficulties. In the case of national bank suspensions, these represent actual failures for which receivers were appointed.

TABLE "O"
SHOWING STATEMENTS OF ASSETS
AND LIABILITIES OF THE INDIVIDUAL NATIONAL BANKS
AT CLOSE OF BUSINESS DECEMBER 31, 1937
IS OMITTED FROM THIS REPORT AND
PUBLISHED AS A SEPARATE TABLE
(States, Territories, and Towns Arranged Alphabetically)

NOTE.—In each of the years 1923 to 1929, inclusive, a table similar to table "O" mentioned above, showing statements of assets and liabilities of the individual national banks for one date in the year, was also issued as a supplement to the Comptroller's report, but in lieu of being designated as tables "A" to "G", inclusive, they were numbered 89, 93, 94, 98, 121, 97, and 103, respectively. Since 1930 the supplements are lettered alphabetically, beginning with the letter "H." Prior to 1923 individual statements were included in the report proper.
